Italian Foodservice Manufacturer Network

Acquista direttamente da produttori specializzati con gli stessi vantaggi di acquistare da distributori master

Buy directly from specialized manufacturers with the same benefits of buying from master distributors

Ora ci presentiamo.

WeCookIT parte nel 2016 come rete di aziende italiane impegnate nell'industria della ristorazione e che condividono gli stessi valori e principi legati al commercio equo: attenzione alla qualità e al cliente, ricerca e innovazione, sviluppo dei prodotti, credibilità e affidabilità. Il mix delle aziende che fanno parte di WeCookIT è molto eterogeneo, andando dall'artigiano al gruppo industriale ma, indipendentemente dalla dimensione dell'azienda, tutte sono in grado di fornire prodotti e servizi su misura ai propri partner.

Dall'azienda più datata (fondata nel 1864) a quella più giovane (fondata nel 1983), la rete fa affidamento su una tradizione riconosciuta e consolidata nel tempo, basata su un'esperienza unica a livello tecnico costruita nel corso degli anni e tramandata di generazione in generazione.

Tutte le aziende hanno sede in un distretto ad alta produttività localizzato nel Nord Italia, comprendente gli hub di Milano e Torino e confinante con Svizzera e Francia. Oltre ai vantaggi dal punto di vista logistico, rappresentati dalla cooperazione a livello operativo tra i propri membri e le ricadute a livello di conoscenze, la vicinanza tra le varie strutture è un vantaggio per tutti i clienti nel Mondo.

A sostegno di questo aspetto, è importante sottolineare il fatto che WeCookIT include una società logistica tra i propri membri.

WeCookIT fornisce un servizio più completo rispetto a qualsiasi altro concorrente presente nel mercato della ristorazione, al quale vanno ad aggiungersi i vantaggi e la qualità dei prodotti offerti dagli artigiani coinvolti.

Un fornitore Made in Italy "all-in-one" per partners attivi nel mercato della ristorazione.

Siamo lieti di invitarVi a fare un tour delle nostre aziende così da poterci conoscere direttamente, scoprire la nostra storia e le nostre tradizioni e valutare i nostri prodotti: dateci fiducia e condividete la nostra filosofia in veste di partner distributivi. WeCookIT.

Let us introduce ourselves.

WeCookIT starts in 2016 from a network of Italian manufacturing Companies active in the food service industry and sharing the same social values and fair business tenets: quality care, customers service, research and innovation, products developments, flexibility and reliability.

The mix of Companies making part of WeCookIT is very heterogeneous, ranging from artisans to industrial organisations but, no matter which the single size is, it can provide tailor-made products and services to its Partners. By the oldest Company established in 1864 to the youngest, set in 1983, the network relies upon a long-lasting, historically recognised manufacturing tradition, gathering unique technical experiences gained over the years and handed down through generations.

All Manufacturers in the net are based in a high-productive district located in Northern Italy, comprising Milan and Turin industrial hubs and bordering on Switzerland and France. Besides the clustering advantages, represented by operational cooperation and knowledge spillovers between its members, the proximity of their facilities turns out as a plus in logistic optimisation for the benefit of all Customers in the world.

To even magnify this aspect, WeCookIT also includes a Logistic company.

WeCookIT provides a more complete service than any other player in the food service scenario, gathering the advantages and quality of buying products offered by their real manufacturers.

A Made in Italy, all-in-one supply to Partners acting in the food service industry.

We are proud to invite you for a tour in our factories so as to meet us, discover our backgrounds and evaluate our products: just trust us and join our philosophy as a distributing Partner. WeCookIT.

Sig. Baldassare. Centodieci anni fa, nel Nord Italia.

Mr. Baldassare. A century ago, in northern Italy.

"Igiene, eleganza, praticità, economia...
Baldassare Agnelli è l'unica fabbrica che può fornire una cucina completa ed omogenea in Alluminio Puro".
Così c'era scritto sul catalogo della nostra prima manifattura di pentole. E il Signor Baldassare, nostro avo, diceva il vero.
Era il 1907, oltre un secolo fa.
In Italia regnava Vittorio Emanuele III, negli Stati Uniti Theodore Roosevelt era al suo secondo mandato di Presidente.

Da allora la fabbrica Agnelli non ha mai smesso di produrre pentole.
Alla maestria artigiana unisce oggi tecnologie sicure e controllate; le pentole Agnelli sono usate in ogni parte del mondo, rispettano le tecniche di cottura più sofisticate e sono apprezzate dai più affermati cuochi e cultori della buona cucina.

*"Hygiene, elegance, practicality, savings...
Baldassare Agnelli is the only factory that can supply a full homogeneous kitchen in pure Aluminum."
That is what was written in the catalog of our first cookware production.
And Mr. Baldassare, our ancestor, spoke the truth. It was 1907, more than a century ago. Vittorio Emanuele III was reigning over Italy, and Theodore Roosevelt was in his second term as President of the United States.*

Ever since then, the Agnelli factory has never stopped manufacturing cookware. Today, safe and secure technology is added to craftsmanship; Agnelli cookware is used all over the world, it meets the most sophisticated cooking techniques and it is appreciated by the most established cooks and lovers of good food.

Baldassare Agnelli

Il Museo della Pentola.

The cookware museum.

L'affascinante tradizione Agnelli si conserva anche nel Museo. Vi è presente, fedelmente restaurata, una riproduzione fedele della antica fabbrica del 900.

Si respira un inconfondibile odore di antichi mestieri: ci sono taglierine e piegatrici, torni in lastra e bordatrici, trance e persino una pressa Schuler degli anni '20 tuttora funzionante e conservate con cura negli anni dalla famiglia Agnelli.

Al suo interno si trovano, decine di pentole provenienti dalla collezione di famiglia: dalla Quadrifoglio del 1936, in grado di cuocere contemporaneamente 5 differenti pietanze, alla Pentola a comparti per cotture a vapore con coperchio a casseruola ermetica... e poi ci sono gavette, portavivande a scomparti, piatti, caffettiere alla turca e un primissimo fornello a spirito brevettato, per l'utilizzo da campo.

Non ultimo il porta borracce immortalato nella famosa foto del passaggio della bottiglia tra Coppi e Bartali il 6 Luglio 1952.

The charming Agnelli tradition is also preserved in the Museum. Here you can find a faithfully restored accurate reproduction of the old factory of 1900.

You can breath an unmistakable air of antique crafts: there are cutters and benders, sheet lathes and flanging machines, and even a Schuler press from the 1920's, still in working order and preserved with care over the years by the Agnelli family.

Within the Museum there are dozens of pots from the family collection: from the Quadrifoglio of 1936, capable of cooking 5 different dishes at the same time, to the Pot in compartments, for steaming casseroles with an airtight lid... and then there are mess tins, compartment containers, plates, Turkish coffee makers and one of the first patented "spirit" stoves, to be used in the field.

Last but not least: the bottle carrier, immortalized in the famous photo of the passing of the bottle between the cycling champions Coppi and Bartali, which took place on July 6th, 1952.

FORNITURE SPECIALI PER CUCINE ELETTRICHE O A PIASTRA
 RADIANTE SPESSORI VARIANTI DA m/m. 3 a m/m. 20 - FONDO
 NORMALE O RETTIFICATO MANICATURA IN ALLUMINIO O OTTONE

Siamo orgogliosi di vivere nelle vostre cucine.
Stars and shapes. We're happy to live in your kitchen.

Molte cose sono cambiate nel nostro modo di vedere la cucina, i principi nutrizionali e la sicurezza alimentare. Ma di sicuro, la bellezza e la perfezione dei nostri strumenti contribuiscono alla riuscita di ogni cottura rispettandone la materia prima utilizzata. Quante forme hanno le nostre pentole?

La padella ("patellam" in latino) è la forma più famosa e diffusa, che si trasforma in tegame quando ha due manici, per poi divenire casseruola con le sponde alte o basse, e poi cocotte ovale dal coperchio ermetico.

Il grande paiolo si è fatto pentola quotidiana, delle più diverse fogge; le cucine nazionali hanno decretato i loro stili, come la paella lionese, la casseruola russa, la cocotte ovale, la sauteuse...

Le forme hanno seguito l'evoluzione dei fornelli: dapprima erano a fuoco aperto, poi governato, poi a piastra e oggi anche ad induzione. E ogni forma di calore ha il suo metallo ed il suo "fondo" preferito, ferroso o meno.

Many things have changed in the way we view our kitchen, our nutritional principles and food safety. But surely, beauty and the perfection of our instruments contribute to the success of each cooking session, with a respect for the raw material used. How many shapes do our pots take on? An infinite number..

The pan ("patellam" in Latin) is the most popular and widespread form, and it becomes a saucepan when it has two handles, and a pot with high or low sides, or an oval cast-iron casserole pan with an airtight lid.

The big copper pot has become the every day pot, with many different shapes.

National cuisines have also created their own styles, like the Lyonnaise frying pan, the Russian casserole pan, the sauteuse, etc.

The shapes have followed the evolution of cookers: first they were open-flame, then covered, then with a hot plate and now there is induction cooking.

And each type of heat has its own favorite metal and "material", whether ferrous or not.

Show Room & Concept Restaurant.

Il punto di arrivo di un percorso che abbraccia oltre un secolo di storia industriale, ristorazione ed eno-gastronomia.

Le ultime creazioni del prestigioso marchio bergamasco, affermato in tutto il mondo, racchiuse nel nuovo Show Room.

Un vero e proprio tempio della pentola, in cui scoprire forme e materiali, Design e versatilità, funzionalità e modernità, senza trascurare hi-tech e multimedialità.

Non un ristorante ma una grande sala da pranzo dove invitare e coccolare ospiti fortunati.

Luogo fuori da tempo e mode, il Concept Restaurant vuole restituire le sensazioni tipiche di un invito a cena per condividere l'armonia e lo spirito di un'azienda storica e nello stesso tempo all'avanguardia nel settore della ristorazione professionale.

The end of a journey covering more than a century of industrial history, food preparation and the art of wine and cookery.

The latest creations of the prestigious Bergamo brand, established world-wide, gathered together in the new Show Room.

A true temple of pots and pans, where you can discover shapes and materials, design and versatility, functionality and modernity, without ignoring hi-tech and multimediality.

More than a restaurant, it's a large dining room for playing host to fortunate guests and pampering them.

A timeless place that follows no passing trends, the aim of the Concept Restaurant is to conjure up the sensations we experience when invited to dinner.

It is a means of sharing the harmony and spirit of a time-honoured company which also manages to maintain a cutting-edge lead in the professional catering trade.

SAPS: il centro studi di Pentole Agnelli.

SAPS: Baldassare Agnelli research center.

SAPS Agnelli Cooking Lab è un centro studi al servizio di chef professionisti, studenti delle scuole alberghiere o anche semplici appassionati che vogliono approfondire la conoscenza degli strumenti di cottura.

L'associazione organizza corsi composti da lezioni teoriche sulla storia ed il corretto impiego dei materiali e da interessanti dimostrazioni pratiche curate da docenti affermati.

SAPS Agnelli Cooking Lab è inoltre uno spazio di incontro dove tutti gli appassionati, che hanno a cuore l'arte culinaria, possono conoscere più da vicino le tematiche che la determinano.

Per statuto **SAPS Agnelli Cooking Lab** tutela e tramanda il patrimonio culturale degli strumenti di cottura del Made in Italy che hanno fatto grande la nostra cucina nel mondo.

SAPS Agnelli Cooking Lab is a research centre devoted to make qualified expertise available to chefs, students of the Hotel and Restaurant Schools and even amateurs who wish to know more about cookware, how they are made, which materials and shapes that perform the best for every type of recipe.

The association organizes courses shared between a theoretic part of lessons regarding the history of the cookware and their correct use and a part of practical demonstrations carried out by high level lecturers.

The aim, established by the founders of **SAPS Agnelli Cooking Lab**, is to safeguard and pass on the rich heritage of cookware know-how that they possess and become a pleasant meeting place for people who care for the culinary art, the gastronomic traditions and who enjoy excellent food.

Quale materiale state mettendo sul fuoco?

What material I put on the fire?

Materiale / Material	Conducibilità / Conductivity W / m ² K	Peso specifico / Specific gravity kg/dm ³
Argento / Silver	420	10,5
Rame / Copper	392	8,9
Copper 3*	320	8,9 / 2,7 / 7,8
Oro / Gold	295	16,7
Alluminio / Aluminum	225	2,7
Aluinox*	190	7,8 / 2,7
Ferro / Iron	60	7,8
Ghisa / Cast iron	50	7,3
Acciaio Inox / Stainless steel	16	7,8
Pietra ollare / Soapstone	6,4	2,98

*Marchio registrato Baldassare Agnelli / *Registered Trademark Baldassare Agnelli

Ogni materiale fa da tramite tra il fuoco e l'alimento. Tre le caratteristiche fondamentali: impermeabilità, resistenza alle alte temperature, conduttività termica. Quest'ultima è essenziale: più un materiale ha una elevata conduttività (esempio: oro e argento, rame e alluminio), minore è il tempo impiegato per raggiungere la temperatura desiderata e migliore è la distribuzione uniforme del calore su tutte le superfici. Fondamentale per ogni cottura.

Each type of material used is a link between the fire and the food.

There are three fundamental characteristics: water resistance, high temperature resistance, and thermal conductivity. This last one is essential: the higher the conductivity of a material (e.g. gold and silver, copper and aluminum), the shorter the time needed to reach the desired temperature, and the better the consistent heat distribution on all surfaces.

Perché cucinare nell'alluminio con purezza superiore al 99%?

Why choosing to cook in a 99% pure aluminum cookware?

IL MATERIALE

Perché abbiamo scelto l'alluminio per produrre le nostre pentole professionali? La risposta è nelle sue molteplici qualità: si adatta a diverse tecniche di cottura, ha un'ottima conducibilità che consente al calore di diffondersi uniformemente su tutta la superficie, è molto leggero e quindi molto maneggevole, è resistente agli urti, agli shock termici, alle abrasioni, alla corrosione, non necessita di alcuna manutenzione ed è un materiale ecologico poiché riciclabile al 100%! Inoltre è un materiale assolutamente igienico e idoneo per il contatto con gli alimenti come ha stabilito il Decreto Legge del 18 aprile 2007 pubblicato dal Ministero della Sanità in materia di disciplina dei materiali e degli oggetti in alluminio e in lega di alluminio destinati a venire a contatto con gli alimenti fondamentale è utilizzare una pentola in alluminio per alimenti, come quelle prodotte da Baldassare Agnelli.

LA CONDUCIBILITÀ TERMICA

Dopo il Rame, e il Copper 3 l'Alluminio per alimenti, è in assoluto il miglior conduttore di calore tra i metalli utilizzati per fabbricare pentole. All'interno di un recipiente di Alluminio per alimenti i cibi cuociono alla medesima temperatura e le pareti non coperte dagli alimenti posti a cottura non si surriscaldano, impedendo così la carbonizzazione di spruzzi o residui di cibo che oltre ad alterare il gusto delle pietanze sono poco salutari. La sua capacità di condurre calore è pari a 225W/K.

Un recipiente dotato di buona conduttività termica consente:

- la regolazione e il mantenimento efficace della temperatura nelle varie fasi di cottura;
- la distribuzione uniforme del calore su tutte le superfici, sia sul fondo sia sulle pareti;
- la conseguente riduzione di surriscaldamenti locali e bruciature
- Risparmio energetico delle fonti di riscaldamento

PREGI

- È un materiale riciclabile;
- Ottima conducibilità termica;
- Risparmio energetico delle fonti di riscaldamento;
- Sicurezza dal punto di vista igienico;
- Conformità alle leggi in materia di contenitori a contatto con gli alimenti;
- Se di spessore adeguato, ottima resistenza agli urti, agli shock termici, alle abrasioni e alla corrosione, non necessita di manutenzione;
- Leggerezza grazie al ridotto peso specifico, da non sottovalutare per chi opera quotidianamente con strumenti di cottura;
- Convenienza rapporto qualità-prezzo;
- Conforme alle vigenti norme HACCP.
- Non sono presenti tracce di NICHEL.

THE MATERIAL

Why did we chose Aluminium to make our professional cookwares?

Because Alu is the Chefs' favourite metal! It is the Best for its quality, its lightness its conductivity and the last but not the least, its great flexibility of use!

With better conductivity there will be less energy use and all the organoleptic properties of the food are fully preserved!

It is hygienic, easy to clean and eco-friendly because it is recycleable at 100%! Baldassare Agnelli's Aluminium cookwares are made in Aluminium and follow all the rules established by Ministero della Sanità on 18 april 2007 for all the cookwares made in Aluminium

THE HEAT AND THERMAL CONDUCTIVITY

After Copper and Copper 3, Aluminium is the best heat conductor among the metals used to make cookwares.

Inside Aluminium cookware (like the ones made by Agnelli's company) Food will be cooked at the same temperature without burning and turning too well done!

That's very important because Food will maintain its taste and all its nutritional qualities.

That's in a few words healthy food!

Alu can conduct 225 W/K heat.

When you are cooking using a good conductor cookware:

- you will be able to maintain and to keep the same quality of heating during all the time required to cook;
- a good heat conductor will spread the heating all around the surfaces either on the bottom and on the internal surfaces;
- thanks to the internal coating, you can use your metal utensil with its handle that stay cool while you are cooking and the pan's rim has been specially designed to make pouring easy and dripless.
- Energy saver.

VALUES

- It is recyclable.
- A very good heat conductor.
- Energy saver.
- Hygienic safe.
- Following the international rules about food containers.
- It's a breeze to wash with a sponge.
- Light and handy.
- Convenient for its price and its quality.
- Following the HACCP rules.
- Nickel free.

LIMITI

- Limitazioni di utilizzo come da Decreto Ministeriale 18 aprile 2007 n° 76:
 - contatto breve: tempi inferiori alle 24 ore a temperatura non refrigerata;
 - contatto prolungato: tempi superiori alle 24 ore a temperatura refrigerata;
 - contatto prolungato: tempi superiori alle 24 ore a temperatura ambiente limitatamente agli alimenti riportati nell'allegato IV del regolamento.
- evitare il contatto con cibi fortemente acidi e/ fortemente salati.

CONSIGLI DI UTILIZZO

- Al primo utilizzo pulire attentamente le pentole, sciacquare con acqua bollente e asciugare; successivamente ungere l'interno con un poco di olio o burro e lasciare riposare per qualche ora, poi risciacquare;
- Gli alimenti cuociono meglio e mantengono più sapore a fuoco moderato. Proprio perché le pentole in Alluminio per alimenti hanno un'alta conducibilità termica non serve MAI utilizzare fiamme alte;
- Evitare il surriscaldamento: non scaldare mai la pentola vuota su un fuoco sia esso alto o basso;
- Durante il lavaggio degli strumenti di cottura in alluminio in lavastoviglie, questi si possono macchiare, ciò dipende dal detergente utilizzato; eventuali macchie sono da considerarsi semplici inestetismi che non vanno a pregiudicare in nessun modo l'integrità dello strumento di cottura; L'eventuale fuoriuscita di acqua dalle maniglie o dal manico è causata dai lunghi cicli di lavaggio delle lavastoviglie casalinghe che facilitano il riempimento degli stessi essendo queste parti in tubolare inox vuoto all'interno. Si sconsigliano pertanto lunghi cicli di lavaggio.
- È pericoloso il contatto con la pentola quando questa è calda;
- I cibi fortemente acidi e salati (ad esempio marinate o salamoie) possono essere comunque perfettamente cucinati in contenitori di Alluminio per alimenti con l'accorgimento di evitare di conservarli per tempi lunghi a temperature non refrigerate.
- Non usare per conservare i cibi "fuori da ambiente refrigerato oltre 24ore";
- Aggiungere il sale solo durante l'ebollizione per favorirne lo scioglimento ed impedire che aggredisca il metallo;
- La patina scura che si forma all'interno delle pentole di Alluminio per alimenti è dovuta all'ossidazione del metallo: una vera propria barriera protettiva inerte che non va tolta. Per mantenere le pentole splendide usare prodotti specifici.

Tutti i materiali che vengono a contatto con gli alimenti sono sottoposti a regolamentazione al fine di tutelare l'integrità della salute. Le pentole in alluminio per alimenti Baldassare Agnelli, sono garantite per alimenti secondo il Decreto Ministeriale 18 aprile 2007 n° 76. Non sono presenti tracce di NICHEL.

LIMITS

- Restrictions about using alu-cookware as from DM April 18th, 2007 n° 76;
- Short contact: less than 24 hrs at not chilled temperature.
- Longer contact: more than 24 hrs at chilled temperature.
- Prolonged contact: more than 24 hrs at room temperature limited to foods listed in the annex to regulation.
- Avoid the contact with too acid/or too salty food.

ADVICES

- When you are using your Alu cookware for the first time, remember to clean it hot water and dry well. Then rub some oil inside the surface and then let it to rest for a couple of hours.
- Food will cook better and the quality of Taste will be better if you keep a medium temperature. Never put your Alluminio cookware on High Flame, it is useless!
- Avoid over heating and do not heat up your alu cookware when it is empty either on a heigh or low flame!
- When washing Alu cookwares in the Dishwasher, if they come out spotted, that's depends on the kind of detergent you are using.
- Any stains you can find on the surface are simple imperfections but have nothing to do with the integrity of the cooking tool.
- Avoid touching the cooking tool when it is hot.
- Strongly acid and salted food like marinated or brines can be perfectly cooked in Alu cookwares only avoid keeping them too long at not chilled temperatures.
- Do not keep food more than 24 hrs out of refrigerator.
- Add salt only when water is boiling to allow melting and to prevent metal to be damaged.
- The dark patina inside you can find in Alu for food is due to oxidation of the metal: a true and safe barrier that must not be taken away. To keep your cookwares shining use specific products.

Every material that gets in contact with food must follow specific rules to protect health integrity. Baldassare Agnelli Aluminium Cookwares are guaranteed safe for food according to DM April 18th, 2007 n° 76. Nickel free.

Lo strumento giusto per ogni cottura

The right tool for every cooking

CASSERUOLA ALTA A UN MANICO

BRASARE - CUOCERE AL FORNO
ARROSTIRE - GRATINARE - STUFARE

Detta anche casseruola alla russa, ha un manico unico e lungo, ideale per tutte quelle preparazioni dirette da eseguire su fiamma o induzione.
La versione a un manico è molto utilizzata per confezionare salse, tirare fondi, mescolare composti, confezionare creme. Sono maneggevoli e polivalenti e si prestano a diverse tipologie di cotture.

ALLUMINIO - RAME - ALUINOX
ANTIADERENTE - COPPER 3 - ACCIAIO INOX
PIETRA OLLARE - GHISA

CASSERUOLA ALTA A 2 MANIGLIE

BRASARE - CUOCERE AL FORNO
ARROSTIRE - GRATINARE - STUFARE

È molto utilizzata per confezionare salse, tirare fondi, mescolare composti, confezionare creme.
Dotata di due maniglie ha una vasta gamma di misure, quelle che costituiscono poi una vera e propria batteria di cucina. Sono maneggevoli e polivalenti e si prestano a diverse tipologie di cotture.

ALLUMINIO - RAME - ALUINOX
ANTIADERENTE - COPPER 3 - ACCIAIO INOX
PIETRA OLLARE - GHISA

CASSERUOLA BASSA A 2 MANIGLIE

BRASARE - CUOCERE AL FORNO
ARROSTIRE - GRATINARE
STUFARE - MANTECARE

Chiamata anche rondeau, adatta per salse e creme che richiedono una rapida vaporizzazione.
È molto utilizzata per confezionare salse, tirare fondi, mescolare composti, confezionare creme. Dotata di due maniglie ha una vasta gamma di misure, quelle che costituiscono poi una vera e propria batteria di cucina. Sono maneggevoli e polivalenti e si prestano a diverse tipologie di cotture.

ALLUMINIO - RAME - ALUINOX
ANTIADERENTE - COPPER 3
ACCIAIO INOX - GHISA

PENTOLA

AFFOGARE - BOLLIRE - SBIANCHIRE
MARINARE - SALAMOIE

Nella pentola sono posti liquidi da far bollire per molto tempo, per mantenere acqua bollente o brodi sempre a disposizione delle cucine.
Difficilmente in essa si confezionano salse o si cucina qualcosa che non sia bollito.

ALLUMINIO - ACCIAIO INOX

PESCIERA

BOLLIRE
STUFARE
CUOCERE AL FORNO
E AL VAPORE

Deve essere leggera e maneggevole. Adatta per la cottura bollita, au bleu, affogatura, in court buillon. Alcune sono adatte per la cottura al forno o brasata. La griglia al suo interno permette anche la cottura dolce al vapore.

ALLUMINIO - RAME - ACCIAIO INOX

ROSTIERA

BRASARE
STUFARE
ARROSTIRE
CUOCERE AL FORNO E AL VAPORE

È impiegata indifferentemente per cotture su piano o in forno. La brasiera, una rostiera che ha i bordi alti circa il doppio, permette la cottura di eccellenti brasati. Mentre la versione a bordi bassi, detta teglia, serve per la cottura in forno.

ALLUMINIO - RAME - ANTIADERENTE
ACCIAIO INOX

Le forme degli strumenti di cottura definiscono la loro precisa funzionalità.

A seconda della forma, ed anche dei materiali, varia infatti la destinazione d'uso e la manutenzione.

The shape of the cooking instruments qualifies their specific function.

According to the shape and the material, we have a different utilization and a different maintenance.

CASSERUOLA OVALE

BRASARE - CUOCERE AL FORNO
ARROSTIRE - GRATINARE - STUFARE

Recipiente per forma e caratteristiche usato per cotture a fuoco dolce.

La forma viene utilizzata per contenere determinati ingredienti che siano in simbiosi con la stessa.

Ad esempio: arrostiti, polli, faraone ecc.

La praticità e la bellezza della forma consente l'utilizzo direttamente in tavola.

ALLUMINIO - RAME - ANTIADERENTE

TEGAME

ARROSTIRE
BRASARE
STUFARE

Il Tegame è un tipo di strumento usato in cucina, affine alla casseruola bassa. È caratterizzato da: fondo ampio, pareti non molto alte, due manici e può essere dotato di coperchio. Viene utilizzato per cotture che non richiedano la bollitura, in particolare per pietanze di carne e verdura.

ALLUMINIO - RAME - ALUINOX
ANTIADERENTE - ACCIAIO INOX - COPPER 3
GHISA - PIETRA OLLARE

WOK

FRIGGERE

È uno strumento di cottura che nella tradizione è completamente emisferico e costruito in ferro. Nella cucina moderna esiste con un piccolo fondo piano, necessario per adattarsi alle fonti di cottura tradizionali, e in diversi materiali, rendendo lo strumento più polivalente e capace di gestire diverse tipologie di cottura. Ideale per cotture dinamiche e "violente". Consente di mantenere a lungo il calore nella versione in ferro.

ALLUMINIO - ANTIADERENTE - FERRO - INOX

PADELLA DRITTA

CARAMELLARE - FRIGGERE - ARROSTIRE

Di forma circolare, ha un solo manico, bordi alti e dritti con fondo largo e piatto. Ideale per friggere. In alluminio garantisce un'omogenea distribuzione di calore. In base alle dimensioni possiamo impiegare quella in ferro per la cottura al salto di sostanze non ricche d'acqua e per friggere. La padella in alluminio antiaderente viene solitamente impiegata per una cucina espressa e veloce, per contorni brasati al burro. Una cucina che svolge un lavoro à la carte sicuramente dovrà adottare padelle del genere, è in assoluto lo strumento più duttile.

ALLUMINIO - FERRO - ALUINOX - ANTIADERENTE
ACCIAIO INOX - RAME - COPPER 3

PADELLA A SALTARE

CUOCERE AL SALTO
MANTECARE

Grazie al fondo stretto e all'angolatura ampia dello strumento di cottura permette, nella versione in alluminio nudo, di essere ottimale per cottura al salto di paste e per l'apertura di mitili.

In alluminio antiaderente viene utilizzata per saltare verdure senza l'aggiunta di sostanze grasse. In alluminio ha il vantaggio di essere uno strumento molto leggero, ergonomico e di comodo e facile utilizzo.

ALLUMINIO - FERRO - ALUINOX
ANTIADERENTE - RAME

PADELLA A MANTECARE

CARAMELLARE
FRIGGERE - CUOCERE AL SALTO
MANTECARE - ARROSTIRE

Avendo bordi molto alti e svasati permette, in fase di mantecazione, l'incorporazione di aria nel saltare.

Grazie al fondo stretto e all'angolatura ampia, nella versione in alluminio nudo, è ottimale per la cottura al salto di risotti.

A differenza della padella a saltare garantisce una capienza maggiore grazie ai bordi alti.

INSERTO IN PORCELLANA PER ART. 104 E 105 cm 10

Porcelain insert for codes 104 and 105
Insert en porcelaine pour les codes 104 et 105
Porzellaneinsatz für Codes 104 und 105
Inserción de la porcelana por los códigos 104 y 105

- Porcellana da forno, resistente ad alte temperature fino a 500°
- Le porcellane da forno possono subire "shock termici" e "sbalzi di temperatura"
- Evitare l'utilizzo in situazioni che possano compromettere la resistenza, (es. dal caldo al freddo, dal forno a piani d'appoggio in marmo o acciaio, da ambienti freddi al forno, ecc...)

- *Porcelain for oven, resistant to high temperatures up to 500°C.*
- *The porcelain for oven can suffer "thermal shocks" and a sudden rise of temperature.*
- *Avoid its bad use in cases of lack of resistance (i.e. from hot to cold, from the oven to a flat marble or stainless steel surface, from a cold place to the oven, etc...)*

COMPOSIZIONE: COMPOSITION

10%	→	Acciaio ferritico per INDUZIONE Stainless steel for INDUCTION
80%	→	Cuore d'alluminio per una perfetta trasmissione del calore Aluminum Heart for a perfect heat conductivity
10%	→	Acciaio inox 18/10 per una facile pulizia Stainless steel 18/10 for an easy cleaning

Questi strumenti di cottura sono realizzati in Alluminio con purezza superiore al 99%. Sono gli strumenti di cottura preferiti dagli Chef professionisti nelle loro cucine.

IL MATERIALE

Il materiale con cui un recipiente è fabbricato costituisce il primo importante requisito da tenere in considerazione.

Lo scopo di una pentola è quello di cuocere gli alimenti ed i materiali rispondono in modo differente alla conduzione del calore.

La capacità, quindi, di condurre il calore è un requisito essenziale.

Tutte le pentole che Baldassare Agnelli Spa produce in alluminio sono realizzate in Alluminio con purezza superiore al 99%.

LA CONDUCIBILITÀ

Dopo il Rame, l'Alluminio con purezza superiore al 99% è in assoluto il miglior conduttore di calore tra i metalli utilizzati per fabbricare pentole. All'interno di un recipiente di Alluminio con purezza superiore al 99% i cibi cuociono alla medesima temperatura e le pareti non coperte dagli alimenti posti a cottura non si surriscaldano, impedendo così la carbonizzazione di spruzzi o residui di cibo che possono alterare il gusto delle pietanze.

Un recipiente dotato di buona conduttività termica consente:

- La regolazione efficace della temperatura nelle varie fasi di cottura.
- La distribuzione uniforme del calore su tutte le superfici, sia sul fondo che sulle pareti.
- La conseguente riduzione di surriscaldamenti locali e bruciature.

COSA FARE, COME FARE

Alcuni buoni e utili consigli di utilizzo degli strumenti di cottura realizzati in Alluminio con purezza superiore al 99%.

- Al primo utilizzo pulire attentamente le pentole, sciacquare con acqua bollente e asciugare. Successivamente ungere l'interno e l'esterno con un poco di olio o burro e lasciare riposare per una notte.
- Gli alimenti cuociono meglio e mantengono più sapore a fuoco moderato, proprio perché le pentole in Alluminio Extra al 99% hanno un'alta conduttività termica non serve MAI utilizzare fiamme alte.
- Evitare il surriscaldamento: non scaldare mai la pentola vuota su un fuoco sia esso alto o basso.
- Non lavare le pentole in Alluminio con purezza superiore al 99% in lavastoviglie.
- È pericoloso il contatto con la pentola quando questa è calda.
- I cibi fortemente acidi e/o salati (ad esempio marinate, salamoie e pomodori) possono essere perfettamente cucinati in contenitori di Alluminio con purezza superiore al 99%.
- I cibi fortemente acidi e/o salati (ad esempio marinate, salamoie e pomodori) non possono essere conservati in contenitori d'Alluminio.
- Non usare per conservare i cibi "fuori da ambiente refrigerato oltre 24 ore".
- Aggiungere il sale solo durante l'ebollizione per favorirne lo scioglimento ed impedire che aggreddisca il metallo.
- La patina scura che si forma all'interno delle pentole di Alluminio con purezza superiore al 99% è dovuta all'ossidazione del metallo: una vera propria barriera protettiva inerte che non va tolta. Per mantenere le pentole splendide usare prodotti specifici.

Useful advice

0 sec.

4 sec.

1 min.

2,15 min.

4,15 min.

- accertarsi che il rivestimento sia applicato a spruzzo;
- evitare di porre il contenitore vuoto sul fuoco, cioè senza nessun alimento o liquido al suo interno;
- sostituire qualora il rivestimento sia usurato;
- al primo utilizzo lavare il contenitore con acqua e "precondizionarlo" cioè ungere leggermente l'interno con olio o burro e poi risciacquare accuratamente. Così da andare a impermeabilizzare i micro fori;
- è ideale per cuocere con pochi grassi, grazie alle doti di antiaderenza, per scottare i cibi e per cotture veloci o al salto.

Distribuzione del Calore

Nelle immagini con termocamera sopra riportate, abbiamo un esempio di come nella padella di alluminio (con uno spessore di 3 mm rivestita in PTFE, riscaldata su piastra a 100°C), il calore si propaghi in modo uniforme dal centro verso l'esterno fino ad arrivare ad una quasi totale omogeneità della temperatura.

- *make sure that the coating is sprayed on.*
- *avoid putting the empty container on the heat source, that is to say, without food inside it.*
- *substitute it if the coating wears out.*
- *on first use wash the container with water and "precondition" it, that is to say, lightly grease the inside with oil or butter and then rinse carefully.*

Heat Distribution

The images taken by a heat camera above show an example of how heat is uniformly propagated from the middle to the outside in an aluminum pot (1/8" thick, PTFE-coated, heated on a plate at 100°C) so as to make temperature almost totally homogeneous.

INFINITY

Per le nuove esigenze dei consumatori

La nuova linea Infinity, realizzata in alluminio e con rivestimento interno Teflon® Infinity, in linea con le mutate esigenze dei consumatori.

Maggiore resistenza ai graffi e all'abrasione che riconosce le tendenze dei clienti verso l'acquisto di prodotti con colorazioni più chiare e naturali.

Questi nuovi prodotti offrono eccellente distacco e pulibilità per cotture esperte e precise, forniscono l'opportunità di cucinare in modo sano, con meno o senza grassi.

Per cotture a gas

Per cotture elettriche

Per cotture radianti

- DuPont™ è alla guida del settore nella realizzazione di programmi di garanzia del marchio che assicurino la qualità associata al marchio Teflon®.
- I sistemi di rivestimento antiaderente in Teflon® riducono non solo il numero di padelle da acquistare, ma anche l'impatto sul Pianeta. Nonché sul portafoglio dell'acquirente.
- I sistemi di rivestimento antiaderente in Teflon® ora vengono prodotti con l'innovativa tecnologia GenX di DuPont™ e senza PFOA.
- La tecnologia GenX fornisce una soluzione più sostenibile realizzata grazie a un nuovo coadiuvante tecnologico e all'implementazione di metodologie di controllo ambientale senza eguali.
- I rivestimenti antiaderenti in Teflon® offrono la possibilità di uno stile di vita più salutare perché consentono di limitare o azzerare le quantità di grasso o olio.
- Gli utensili consentono di cucinare mantenendo costante una temperatura massima di 260 °C su tutte le fonti di calore (ad esclusione della cucina ad induzione).

PRODOTTO PER LA PULIZIA DELL'ALLUMINIO

Aluminum cleaner / Agent de nettoyage de l'aluminium
Aluminium Reinigungsmittel / Producto para la limpieza del aluminio

Condizioni di impiego

Utilizzare al 5-10% (1/2 litro - 1 litro per 10 litri d'acqua).
Immergere il materiale da pulire per circa 15 minuti.
Risciacquare e asciugare.

Instructions for use

Use a 5-10% ratio (1/2 litre - 1 litre per 10 litres of water).
Soak the material to clean for around 15 minutes.
Rinse thoroughly and dry as usual.

Conditions d'emploi

Utiliser à 5-10% (1/2 litre - 1 litre pour 10 litres d'eau).
Immerger le matériel à nettoyer pendant environ 15 minutes.
Rincer et sécher.

Anwendungsbedingungen

In einer Konzentration von ca. 10-15% verwenden (1/2 Liter für 10 Liter Wasser) Das zu reinigende Material für ca. 15 Minuten eintauchen. Abspülen und trocknen.

Condiciones de empleo

Utilizar al 5-10% (1/2 litro - 1 litro por cada 10 litros de agua).
Sumergir en el líquido el material que se debe limpiar durante unos 15 minutos. Aclarar y secar.

Multiforme e multimateriale

CONTENUTO DEL KIT

Rame stagnato:

- Casseruola alta 2 maniglie Ø 24cm
- Coperchio Ø 24cm

Alluminio antiaderente

- Padella alta con antiaderente Teflon 1 manico Ø 24cm
- Tegame con antiaderente Teflon 2 maniglie Ø 28cm

Alluminio indeformabile:

- Casseruola alta 1 manico Ø 16cm
- Casseruola bassa 2 maniglie Ø 28cm
- Coperchio Ø 28cm
- Tegame rettangolare Ø 35cm

Acciaio Inox:

- Pentola Ø 20cm
- Coperchio Ø 20cm

In dotazione:

- Pinze Chef 35cm
- Guida agli strumenti di cottura
- Grembiule "Promessi cuochi"

**COLLEZIONE PROMESSI CUOCHI

Per cucinare su piastra elettrica e su piastra radiante, si consiglia l'utilizzo delle serie ad induzione che hanno doppio fondo adeguato alle alte temperature.

For cooking on electric and/or radiant hot plate, we advise to use our induction line which has a double bottom that is appropriate for high temperatures

Cos'è il trattamento G.H.A.?

What is G.H.A. treatment?

G.H.A.[®] è una tecnologia giapponese innovativa applicabile sulle superfici di manufatti in leghe di alluminio che consiste in una speciale anodizzazione dura in cui, nello spessore trattato, si diffondono ioni di argento. Pertanto le superfici ricoperte con G.H.A.[®] godono di tutte le proprietà specifiche dell'argento.

G.H.A.[®] is the most recent and innovative technology applicable to the surface of all the aluminum alloys that consist in a special anodic oxidation treatment with Silver ions. Therefore all the surfaces treated with G.H.A.[®] will have the same properties of Silver.

Why the G.H.A.[®] treatment?

- High antibacterial and anti-mildew capacity
- Bacteriostatic capacity (Graph 1).
- Resistance to corrosion.
- Low coefficient of friction, self-lubrication and wear resistance.
- High thermal conductivity and high thermodynamic yield.
- Capacity of absorb heat and to return it by infrared emissions.
- High antistatic capacity.

Perché il trattamento G.H.A.[®]?

- Elevata capacità antibatterica ed antimuffa (Grafico 1).
- Resistenza alla corrosione (100 volte superiore alla lega d'Alluminio).
- Autolubrificazione e resistenza all'usura.
- Elevata conducibilità termica.
- Resistenza al fuoco e al calore.
- Capacità di assorbire calore e di riemetterlo con onde ultrainfrarosse.
- Proprietà antistatiche.
- Il trattamento risulta essere inasportabile.

Le fasi di produzione di una pentola.

The Production Stages of a pot

STAMPAGGIO O TORNITURA PRESSING OR TURNING

La pressa stampa il disco che assume, in una versione grezza, la forma voluta. Successivamente si effettua la rifinitura per eliminare le imperfezioni e la pulitura che gli conferisce l'aspetto definitivo. Per le pentole in acciaio è necessaria una ulteriore fase di lavorazione detta lucidatura, per conferire al metallo la sua tipica brillantezza.

The press forges the disk, which roughly assumes the desired shape. Subsequently it is touched-up to eliminate imperfections and is cleaned, giving the final appearance. For steel pots, a final working step known as polishing is needed, which gives the sheen typical of this metal.

MANICATURA HANDLE

Manici e maniglie devono rispondere a importanti requisiti per consentire un utilizzo professionale sicuro ed efficace. Innanzitutto devono essere di un materiale non conduttore di calore, per preservare l'utilizzatore dal rischio di scottature: ad esempio sono spesso impiegati tubolari in acciaio inox.

L'applicazione di manici e maniglie nelle pentole in rame e alluminio avviene inchiodando gli stessi al corpo della pentola tramite rivetti in lega particolarmente resistenti (AG5) o dello stesso metallo del contenitore. Per l'acciaio invece, trattandosi di materiale molto duro, le maniglie vengono saldate direttamente al corpo della pentola. Manici e maniglie sono per lo più realizzati in acciaio, in modo tale da preservare il più possibile dal rischio di scottature. Solo nel caso del rame, per un fattore di tradizione ed estetica, si preferisce l'utilizzo di manici e maniglie in ottone.

Handles must meet certain important requirements to allow professional, safe and efficient use. First of all, they must be made of a material which does not conduct heat, to prevent the user from being burnt.

The application of handles onto copper and aluminum pots is carried out by nailing them onto the body of the pot with particularly resistant alloy rivets (AG5) or with rivets made from the same metal as the container. For steel on the other hand, which is a very hard material, the handles are soldered directly onto the body of the pot. Handles are mostly made from steel, in order to lower the risk of being burnt. Only in the case of copper, is the use of brass handles preferred, and this is due to aesthetic reasons.

PENTOLE AGNELLI
PROFESSIONAL COOKWARE

Essendo ancora la nostra una produzione artigianale le misure non possono essere considerate precise al millimetro ma soltanto indicative.

Certificazioni

Certifications

I prodotti Pentole Agnelli rappresentano il Made in Italy in tutto il mondo, segno di qualità e tradizione.
Pentole Agnelli aderisce al programma europeo AFFG (Aluminum For Future Generation) ed a CentroAl - Alluminio in Cucina, il consorzio che riunisce in Italia i Produttori di Pentole Professionali.

Pentole Agnelli products represent the Made in Italy all over the world, a synonym of quality and tradition.
Pentole Agnelli adheres to the European program AFFG (Aluminum for Future Generation) and to CentroAl - Aluminum in the Kitchen, the syndicate gathering the Italian Manufacturers of Professional Cookware.

Pentole Agnelli persegue l'obiettivo della piena soddisfazione dei propri clienti attraverso un prodotto di qualità, un servizio garantito da personale specializzato, il rispetto della puntualità nelle consegne ed un prezzo competitivo.
Pentole Agnelli ha attuato un Sistema di Gestione per la Qualità in accordo ai requisiti della norma UNI EN ISO 9001:2008 per la quale è stata certificata.

Pentole Agnelli pursues the fullest customer satisfaction through high quality products, specialized personnel, respect of delivery deadlines and competitive prices.
Pentole Agnelli has implemented a Quality Management System in compliance with the requirements of UNI EN ISO 9001:2008, for which it has been certified.
